

HUMAN HERPESVIRUS 6A AND 6B TRANSFER FACTORS FOR THE  
TREATMENT OF CHRONIC FATIGUE SYNDROME AND MULTIPLE  
SCLEROSIS

5 Abstract of the Disclosure

The present invention provides transfer factors that confer cell-mediated immunity to Human Herpesvirus-6A and Human Herpesvirus-6B. The invention also provides  
10 pharmaceutical compositions comprising the transfer factors and methods of treating abnormalities in a subject using the transfer factors.
